Qualifications Profile

Dynamic and innovative professional with a sharp technical acumen, passion for software development, and 15+ years' success in biopharmaceutical industry, poised to leverage keen programming expertise within an Agile environment.

- Familiar with the entire web development process from design and development to testing and deployment. Well-schooled in translating UX concepts into code, developing new user features, and participating in code reviews. Proficient in crafting code for various software functions, testing the functionality of web apps, and tweaking the code to perfection.
- Knowledge of standard programming algorithms, data structures, and object oriented software designs. Ability to design web-based user interfaces, develop interactive mockups, and optimize user experiences by using usability case studies, wireframes, and prototypes. Ability to discuss requirements with clients, write clean code, and develop dynamic solutions.
- Quick learner, creative problem solver, and excellent team leader with a 'can-do' attitude and ability to propel projects and teams to peak results while working with minimum supervision. Motivated to collaborate with designers, developers, clients, and other product stakeholders to enhance product features, functionality, and reliability.
- Superior communication, organizational, and analytical skills. Capacity to work well under pressure, quickly learn job functions, and effectively handle a variety of tasks while remaining detail oriented. Excel in high-growth environments with tight deadlines and shifting priorities. Curiosity to learn new tools and technologies.

Core Technologies

Languages:	HTML, CSS (Sass), JavaScript
Frameworks & Databases:	Bootstrap, React.js, Node.js, React Native, Redux, Express, MongoDB
Software & Tools	Git/GitHub, npm, Microsoft Visual Studio Code, Heroku

Education & Credentials

Certificate in Full Stack Web & Mobile Development | Nucamp Coding Bootcamp (2020)

Relevant Coursework: Responsive Web with Bootstrap, Web Development with React, Mobile Development with React Native, Back End with NodeJS, Databases and Storage, Web Application Architecture, Visual Studio Code, Packaging and Compiling

General Studies Program | Blue Ridge Community College, Weyers Cave, Virginia

Experience Highlights

Web Developer | Freelance, Charlotte, North Carolina

(2020 – Present)

- Design, develop, and maintain interactive websites and web-based applications using various programming languages, frameworks, and tools while working collaboratively with clients in a remote environment.
- Manage development process from design to deployment, build responsive interfaces with accessibility, user experience, and performance in mind, and implement pre-project analysis and assessments to ensure client's satisfaction.

Owner/Engineer | Three Arrows Sound, Charlotte, North Carolina

(2014 – Present)

- Produce and arrange raw ideas into polished, radio-ready tracks by managing all aspects of recording/mixing process while continually impressing music industry veterans with outstanding work ethic, talent, and attitude.
- Develop the business website from the scratch and maintain website/email-list by managing email funnels and creating content for blog.

Materials Coordinator | StageBio, Mount Jackson, Virginia

(2016 – 2020)

- Spearheaded all facets of materials coordination and supervised inventory control functions while overseeing the preparation of study materials and managing systems for organization of active studies.
- Provided leadership, oversight, and training to employees and ensured return of study materials in a timely manner by closely monitoring all the activities and delegating tasks.
- Ensured secure delivery and setup of study materials in accordance with the appropriate protocols and standards by corresponding and interfacing with clients.
